DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
 - REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (i) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The disclosure is objected to because of the following informalities: It does not

have the various sections with titles as indicated above.

Art Unit: 1731

Appropriate correction is required.

The abstract of the disclosure is objected to because it is not in the form of a single paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "mold body" is indefinite as to its meaning. The second paragraph of the specification indicates that such are frequently used in the optical fiber art.

Examiner has been examining in the optical fiber art for over ten years and has never heard of mold bodies being used as presently disclosed. It appears that the term is the result of the translation. One of ordinary skill would be unclear as to whether it is limited to a fiber "preform" – or whether it must actually be a mold, or what.

Claim 20: their is no antecedent basis for "the hoisting apparatus adjacent the heating zone."

Claims 26 and 36: there is no antecedent basis for "the deviation structure".

Claim 37: there is antecedent basis for "the traction direction..."

Art Unit: 1731

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 19, 35, 36 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohga 5259856.

Looking to figure 9 of Ohga: 37 substantially points to a wall which delimits the chamber. 11 is the duct. The heating zone is near 4. The hoisting apparatus is not shown. It would have been obvious to have an apparatus to lift and rotate rod 2 as shown in the drawings – because it would be much easier to have an apparatus do it, rather than a person. The device comprises the obvious lifting/rotating apparatus as well as the rod 2, and the two feed-throughs 8 and 16. The hoisting apparatus comprises the rod 2 and the two feed throughs. The drive comprises the obvious apparatus which lifts and rotates rod 2. The drive shaft is 2.

Claims 35-36: it is noted claim 35 merely recites a step. There is no requirement that the device is part of the claimed structure – therefore it would be improper for the Office to determine that the claim requires the device be part of the structure. There is nothing which would preclude one from performing a step of using a force-sensing device to measure a force in the Ohga apparatus. It is noted that this is NOT a determination that it would have been obvious to determine a force or even have a force-sensing device. So this should not be construed to be such a determination.

Art Unit: 1731

Claim 38: 16 and/or 8 are catches that limit vertical movement of a mold body.

Allowable Subject Matter

Claims 20-34, 37 and 39 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Youn is cited as being of general interest. Hara and Terashima are cited as being representative of other references that could have been used to show that the claims are obvious.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Hoffmann whose telephone number is (571) 272 1191. The examiner can normally be reached on Monday through Friday, 7:00- 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
